Task Wazuh

Introduction

Wazuh serves as a comprehensive, open-source ecosystem integrating **SIEM** and **XDR** functionalities. It is designed to provide continuous system monitoring and advanced threat detection, ensuring enterprise-level adherence to regulatory frameworks such as **GDPR** and **PCI DSS**. The architecture is built on three core pillars: the **Wazuh Manager** for centralized telemetry analysis, the **Wazuh Indexer** for high-performance data indexing, and the **Wazuh Dashboard** for intuitive security visualization. This implementation focuses on hosting the Wazuh stack on **Kali Linux** to create a robust, real-time defensive monitoring hub for proactive incident response and vulnerability management.

```
(kali@kali)-[~]
$ sudo systemctl stop wazuh-manager
sudo systemctl stop wazuh-indexer
sudo systemctl stop wazuh-dashboard

(kali@kali)-[~]
$ sudo bash wazuh-install.sh -a -i -o
12/03/2026 02:15:45 INFO: Starting Wazuh installation assistant. Wazuh version: 4.7.5
